One of the Best Gas Filling station in Hyderabad:

At OXYNOW, we present you the best cutting edge Medical and Industrial gas solutions designed to enhance your operations. With a commitment to quality, precision and efficiency, we specialize in providing tailored gas mixtures and reliable cylinder refilling services best suitable to your esteemed industry. Explore our diverse range of gases and find the perfect fit for your Industrial needs. Experience the excellence, innovation and seamless services at our facility.

OXYNOW filling station for Medical & Industrial gases is a marvel of groundbreaking facility designed to handle the precise filling of cylinders with various gases. Equipped with cutting edge class of machinery and systems, this station sets a new standard in the Industry.

- Facility for filling 150, 200 & 300 bar Cylinders
- Facility to fill multiple as mixtures into one cylinder with remarkable accuracy.
- Automated filling system with sensor based filling enabling a safe and rapid filling.
- A total of Four filling bays facilitating parallel filling of cylinders
- Dedicated location and filling manifold for MCPs

Dry Ice Manufacturing Facility:

We at OXYNOW have set up a 450 Kg press to produce a 1.45 density Dry Ice block. The dry ice manufacturing setup utilizes advanced machinery to produce solid carbon dioxide, catering to Industries reliant on this unique cooling agent for shipping, food preservation and clearing applications. Each block is of 250 mm X 200 mm dimensions.

Many such advanced machineries have been installed at our facility to ensure safety, quality and quantity of the products produced and manufactured at OXYNOW

A Vast tank farm setup, housing tanks for various cryogenic liquefied gases like Liquid Argon (LAR), Liquid Oxygen (LOX), Liquid Carbon Dioxide (LCO₂) and tanks for Argon (LAN) & Liquid Nitrogen (LIN), stands as a testament to Industrial scale gas storage. The sheer scale and diversity of gases stored within this farm cater to a broad spectrum of applications, ranging from medical and scientific research to manufacturing & food preservation. Such a comprehensive setup ensures a steady and reliable supply of essential gases, enabling diverse industries to function seamlessly while adhering to stringent quality and safety standards.

Our Infrastructure:

Oxygen: 20 Tons

Nitrogen: 13 Tons

Carbon Dioxide: 20 Tons

Argon: 13 Tons

A spacious gas-filling plant set up in a vast area
Storage facility for Cryogenic liquids

Filling facility for up to 300 bar pressure cylinder

we have many cylinders to cater for various hospitals and industries

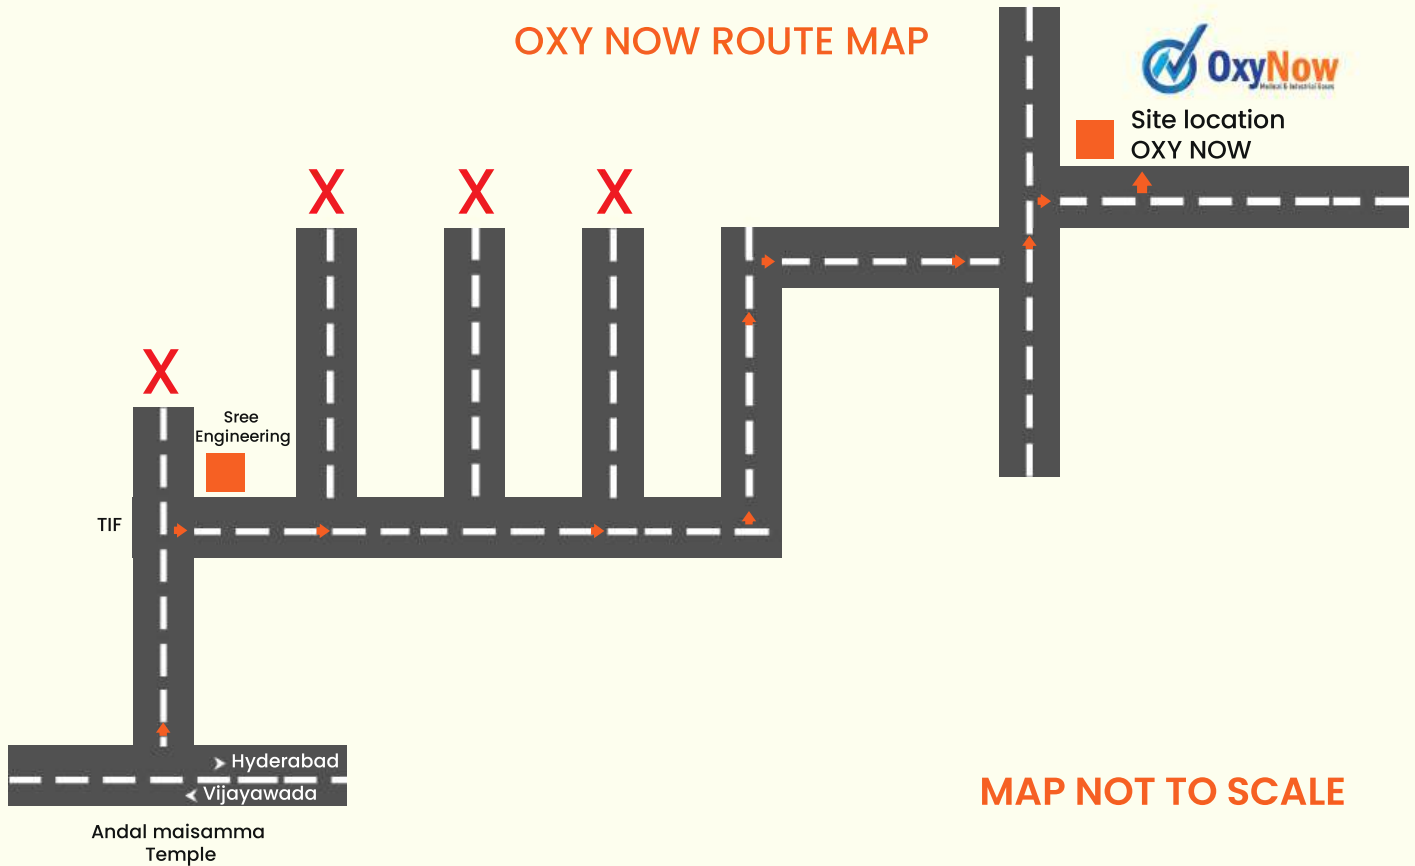

company sells brand new cylinders and spares

Gas chromatography for better analysis of calibration gases

Dry Ice manufacturing facility

Cryogenic Dura cylinders to cater to various industrial and medical needs.
